PIPE MANUFACTURED BY PITTSBURGH PIPE IS INSPECTED AND MEASURED 28 TIMES

DURING THE MANUFACTURING PROCESS

High-level quality control inspections assure our customers that they're installing pipe with the dimension standards and weld quality called for on today's demanding installation projects.

We're with our customers from bid through project completion to ensure the casing pipe we deliver meets their expectations. Our knowledgeable and experienced team will help you find the right pipe for your job — and we'll make sure your pipe is delivered where you need it, right on time.
