

# PITTSBURGH PIPE

SINCE 1977

## THE RIGHT PIPE. RIGHT ON TIME.

WE SERVE THE UNDERGROUND UTILITY CONSTRUCTION INDUSTRY, AND HAVE SUCCESSFULLY PROVIDED CONTRACTORS WITH SPLIT CASING FOR MORE THAN 20 YEARS.

### SPLIT FLANGED CASING

Split Flanged Casing is the perfect solution for encasing existing lines without interrupting service, when field welding is not an option, or where access is needed for future maintenance. The pipe is split longitudinally, split flanges are attached to both ends, and pre-drilled flat bars are attached to each horizontal side. Our precise manufacturing processes result in perfectly aligned connections and we supply all standard hardware for assembly, which makes installation fast and easy.

#### SIZES AVAILABLE:

**Diameter:** 12" to 72" | Offered in a Full Range of Wall Thicknesses
